

# M.Sc. Computer Science

## Syllabus

### AFFILIATED COLLEGES

ProgramCode:32K

Effective from 2025–2026 and Onwards

# BHARATHIARUNIVERSITY

(A State University, Accredited with “A++” Grade by NAAC, Ranked  
21<sup>st</sup> among Indian Universities by MHRD-NIRF)

Coimbatore-641046, Tamil Nadu, India

| Program Educational Objectives(PEOs)  |   |
|---|---|
| The <b>M.Sc Computer Science</b> programme describe accomplishments that graduates are expected to attain within Five to seven years after graduation |   |
| PEO1  | To enrich the students with the clear picture of the course objectives and to map their requirements.                                       |
| PEO2  | To enable the students, to understand the core concepts, visualize and to apply them in the real time scenarios.                            |
| PEO3  | To impart the need for consistent learning, importance of research & development for the welfare of the society and to the nation at large. |

| Program Specific Outcomes (PSOs)  |  |
|---|--|
| After the successful completion of <b>M.Sc Computer Science</b> programme, the students are expected to |  |
| PSO1  | Able to analyze, design and develop problem solving skills in the discipline of computer science.  |
| PSO2  | Acquire evaluation of potential benefits of alternative solution in designing software and/or hardware systems in broad range of open source programming languages to withstand technological changes. |
| PSO3  | Able to pursue careers in IT industry/consultancy/research and development, teaching and allied areas related to computer science.   |
| PSO4  | Adapt to the continuous technological change in computational science and update them selves to meet the industry requirements and standards.  |
| PSO5  | Apply the practices and strategies of computer science for software project development to deliver a quality software product and contribute to research in the chosen field and perform effectively.  |

| <b>Program Outcomes(POs)</b>   |  |
|--|--|
| On successful completion of the <b>M.Sc Computer Science</b> Programme |  |
| PO1  | Develop creativity and problem solving skills with the knowledge of computing and mathematics. |
| PO2  | Ability to develop and carry out experiments, interpret and infer data.                        |
| PO3  | Design algorithms and develop software to aid solutions to industry and governments.           |
| PO4  | Review the latest technology and tool handling mechanism.                                      |
| PO5  | Analyze the outcome to solve global environment related issues.                                |
| PO6  | Apply the knowledge in lifelong learning journey to equip themselves.                          |
| PO7  | Identify the perspective of business practices, risks and limitations.                         |
| PO8  | Work with professional and ethical values.   |
| PO9  | Formulate the responsibilities of human rights and entrepreneurial spirit.                     |
| PO10   | Understand the methods to communicate effectively and work collectively.                       |

**BHARATHIARUNIVERSITY::COIMBATORE641046**

**M.Sc Computer Science (Affiliated Colleges)**

(Effective For the candidates admitted during the academic year -2025–2026 and Onwards)

**REVISED SCHEME OF EXAMINATIONS– CBCS PATTERN**

| Course Code       | Title of the Course   | Credits | Hours  |           | Maximum Marks |     |       |
|-------------------|---|---------|--------|-----------|---------------|-----|-------|
|                   |   |         | Theory | Practical | CIA           | ESE | Total |
| FIRST SEMESTER    |   |         |        |           |               |     |       |
| 13A               | Paper I: Analysis & Design of Algorithms  | 4       | 5      |           | 25            | 75  | 100   |
| 13B               | Paper II : Object Oriented Analysis and Design & C++  | 4       | 5      |           | 25            | 75  | 100   |
| 13C               | Paper III: Python Programming   | 4       | 5      |           | 25            | 75  | 100   |
| 13D               | Paper IV : Advanced Software Engineering  | 4       | 5      |           | 25            | 75  | 100   |
| 13P               | Practical I: Algorithm and OOPS Lab   | 4       |        | 5         | 40            | 60  | 100   |

# **First Semester**

| Course code   |  | ANALYSIS & DESIGN OF ALGORITHMS    | L                | T | P       | C     |
|---|--|------------------------------------|------------------|---|---------|-------|
| Core/Elective/Supportive  |  | Core                               | 4                |   |         | 4     |
| Pre-requisite   |  | Basic Data Structures & Algorithms | Syllabus Version |   | 2021-22 |       |
| Course Objectives:  |  |                                    |                  |   |         |       |
| The main objectives of this course are to:  |  |                                    |                  |   |         |       |
| 1. Enable the students to learn the Elementary Data Structures and algorithms.  |  |                                    |                  |   |         |       |
| 2. Presents an introduction to the algorithms, their analysis and design  |  |                                    |                  |   |         |       |
| 3. Discuss various methods like Basic Traversal And Search Techniques, divide and conquer method, Dynamic programming, backtracking   |  |                                    |                  |   |         |       |
| 4. Understood the various design and analysis of the algorithms.  |  |                                    |                  |   |         |       |
| Expected Course Outcomes:   |  |                                    |                  |   |         |       |
| On the successful completion of the course, student will be able to:  |  |                                    |                  |   |         |       |
| 1   | Get knowledge about algorithms and determines their time complexity. Demonstrate specific search and sort algorithms using divide and conquer technique. |                                    |                  |   |         | K1,K2 |
| 2   | Gain good understanding of Greedy method and its algorithm.  |                                    |                  |   |         | K2,K3 |
| 3   | Able to describe about graphs using dynamic programming technique.   |                                    |                  |   |         | K3,K4 |
| 4   | Demonstrate the concept of backtracking & branch and bound technique.  |                                    |                  |   |         | K5,K6 |
| 5   | Explore the traversal and searching technique and apply it for trees and graphs.   |                                    |                  |   |         | K6    |
| K1-Remember; K2 -Understand; K3-Apply; K4 -Analyze; K5-Evaluate; K6 -Create   |  |                                    |                  |   |         |       |
| Unit:1  |  | INTRODUCTION                       |                  |   | 15hours |       |
| Introduction: Algorithm Definition and Specification – Space complexity-Time Complexity-Asymptotic Notations - Elementary Data Structure: Stacks and Queues – Binary Tree - Binary Search Tree - Heap – Heap sort- Graph. |  |                                    |                  |   |         |       |
| Unit:2  |  | TRAVERSAL AND SEARCH TECHNIQUES    |                  |   | 15hours |       |
| Basic Traversal And Search Techniques: Techniques for Binary Trees-Techniques for Graphs - Divide and Conquer: General Method – Binary Search – Merge Sort – Quick Sort.  |  |                                    |                  |   |         |       |
| Unit:3  |  | GREEDY METHOD                      |                  |   | 15hours |       |
| The Greedy Method: General Method–Knapsack Problem–Minimum Cost Spanning Tree– Single Source Shortest Path.   |  |                                    |                  |   |         |       |
| Unit:4  |  | DYNAMIC PROGRAMMING                |                  |   | 15hours |       |
| Dynamic Programming: General Method–Multistage Graphs–All Pair Shortest Path–Optimal Binary Search Trees – 0/1 Knapsacks – Traveling Salesman Problem – Flow Shop Scheduling.   |  |                                    |                  |   |         |       |

|   |   |         |
|---|---|---------|
| Unit:5  | BACKTRACKING  | 13hours |
| Backtracking: General Method–8-Queens Problem–Sum Of Subsets–Graph Coloring– Hamiltonian Cycles – Branch And Bound: - The Method – Traveling Salesperson. |   |         |
|   |   |         |
| Unit:6  | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars– webinars  |   |         |
|   |   |         |
|   | Total Lecture hours   | 75hours |
|   |   |         |

| Course code  |   | OBJECT ORIENTED ANALYSIS AND DESIGN & C++  | L                | T | P       | C     |
| Core/Elective/Supportive   |   | Core                                       | 4                |   |         | 4     |
| Pre-requisite  |   | Basics of C++ and Object Oriented Concepts | Syllabus Version |   | 2021-22 |       |
| Course Objectives:   |   |  |                  |   |         |       |
| The main objectives of this course are to:   |   |  |                  |   |         |       |
| 1. Present the object model, classes and objects, object orientation, machine view and model management view.  |   |  |                  |   |         |       |
| 2. Enables the students to learn the basic functions, principles and concepts of object oriented analysis and design.  |   |  |                  |   |         |       |
| 3. Enable the students to understand C++ language with respect to OOAD   |   |  |                  |   |         |       |
| Expected Course Outcomes:  |   |  |                  |   |         |       |
| On the successful completion of the course, student will be able to:   |   |  |                  |   |         |       |
| 1  | Understand the concept of Object-Oriented development and modeling techniques |  |                  |   |         | K1,K2 |
| 2  | Gain knowledge about the various steps performed during object design         |  |                  |   |         | K2,K3 |
| 3  | Abstract object-based views for generic softwaresystems                       |  |                  |   |         | K3    |
| 4  | Link OOAD with C++ language   |  |                  |   |         | K4,K5 |
| 5  | Apply the basic concept of OOPs and familiarize to write C++ program          |  |                  |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create  |   |  |                  |   |         |       |
| Unit:1   |   |  |                  |   |         |       |
| OBJECT MODEL   |   |  |                  |   |         |       |
| 15hours  |   |  |                  |   |         |       |
| The Object Model: The Evolution of the Object Model – Elements of the Object Model – Applying the Object Model. Classes and Objects: The Nature of an Object – Relationship among Objects.   |   |  |                  |   |         |       |
| Unit:2   |   |  |                  |   |         |       |
| CLASSES AND OBJECTS  |   |  |                  |   |         |       |
| 15hours  |   |  |                  |   |         |       |
| Classes and Object: Nature of Class – Relationship Among classes – The Interplay of classes and Objects. Classification: The importance of Proper Classification –identifying classes and objects –Key Abstractions and Mechanism. |   |  |                  |   |         |       |
| Unit:3   |   |  |                  |   |         |       |
| C++ INTRODUCTION   |   |  |                  |   |         |       |
| 15hours  |   |  |                  |   |         |       |
| Introduction to C++: Input and output statements in C++-Declarations-control structures– Functions in C++.   |   |  |                  |   |         |       |
| Unit:4   |   |  |                  |   |         |       |
| INHERITANCE AND OVERLOADING  |   |  |                  |   |         |       |
| 13hours  |   |  |                  |   |         |       |
| Classes and Objects–Constructors and Destructors–operators overloading–Type Conversion-Inheritance – Pointers and Arrays.  |   |  |                  |   |         |       |

|   |   |                |
|---|---|----------------|
| <b>Unit:5</b>   | <b>POLYMORPHISM AND FILES</b>   | <b>15hours</b> |
| Memory Management Operators-Polymorphism–Virtual functions–Files–Exception Handling – String Handling -Templates. |   |                |
| <b>Unit:6</b>   | <b>Contemporary Issues</b>  | <b>2 hours</b> |
| Expert lectures, online seminars–webinars   |   |                |
|   | <b>Total Lecture hours</b>  | <b>75hours</b> |
| <b>Text Books</b>   |   |                |

| Pre-requisite  |   | Basics of any OOProgramming Language | Syllabus |   | 2021-22 |       |
| Course Objectives:   |   |                                      |          |   |         |       |
| The main objectives of this course are to:   |   |                                      |          |   |         |       |
| 1. Presents an introduction to Python, creation of web applications, network applications and working in the clouds  |   |                                      |          |   |         |       |
| 2. Use functions for structuring Python programs   |   |                                      |          |   |         |       |
| 3. Understand different Data Structures of Python  |   |                                      |          |   |         |       |
| 4. Represent compound data using Python lists, tuples and dictionaries   |   |                                      |          |   |         |       |
| Expected Course Outcomes:  |   |                                      |          |   |         |       |
| On the successful completion of the course, student will be able to:   |   |                                      |          |   |         |       |
| 1  | Understand the basic concepts of Python Programming |                                      |          |   |         | K1,K2 |
| 2  | Understand File operations, Classes and Objects     |                                      |          |   |         | K2,K3 |
| 3  | Acquire Object Oriented Skills in Python            |                                      |          |   |         | K3,K4 |
| 4  | Develop web applications using Python               |                                      |          |   |         | K5    |
| 5  | Develop Client Server Networking applications       |                                      |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create  |   |                                      |          |   |         |       |
| Unit:1   |   |                                      |          |   |         |       |
| INTRODUCTION   |   |                                      |          |   |         |       |
| 15hours  |   |                                      |          |   |         |       |
| Python: Introduction–Numbers–Strings–Variables–Lists–Tuples–Dictionaries–Sets– Comparison.   |   |                                      |          |   |         |       |
| Unit:2   |   |                                      |          |   |         |       |
| CODE STRUCTURES  |   |                                      |          |   |         |       |
| 15hours  |   |                                      |          |   |         |       |
| Code Structures: if, else if, and else – Repeat with while – Iterate with for – Comprehensions – Functions – Generators – Decorators – Namespaces and Scope – Handle Errors with try and except – User Exceptions.   |   |                                      |          |   |         |       |
| Unit:3   |   |                                      |          |   |         |       |
| MODULES, PACKAGES AND CLASSES  |   |                                      |          |   |         |       |
| 15hours  |   |                                      |          |   |         |       |
| Modules, Packages, and Programs: Standalone Programs – Command-Line Arguments – Modules and the import Statement – The Python Standard Library. Objects and Classes: Define a Class with class – Inheritance – Override a Method – Add a Method – Get Help from Parent with super–Inself Defense –Get and Set Attribute Values with Properties –Name Mangling for Privacy – Method Types – Duck Typing – Special Methods –Composition. |   |                                      |          |   |         |       |
| Unit:4   |   |                                      |          |   |         |       |
| DATA TYPES AND WEB   |   |                                      |          |   |         |       |
| 13hours  |   |                                      |          |   |         |       |
| Data Types: Text Strings–Binary Data. Storing and Retrieving Data: File Input / Output– Structured Text Files – Structured Binary Files - Relational Databases – No SQL Data Stores.   |   |                                      |          |   |         |       |
| Web: Web Clients –Web Servers–Web Services and Automation  |   |                                      |          |   |         |       |

|   |   |         |
|---|---|---------|
| Unit:5  | SYSTEMS AND NETWORKS  | 15hours |
| Systems: Files–Directories–Programs and Processes–Calendars and Clocks.   |   |         |
| Concurrency: Queues– Processes–Threads–Green Threads and gevent–twisted–Redis.  |   |         |
| Networks: Patterns – The Publish-Subscribe Model – TCP/IP – Sockets – ZeroMQ –Internet Services – Web Services and APIs – Remote Processing – Big Fat Data and MapReduce – Working in the Clouds. |   |         |
|   |   |         |
| Unit:6  | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars–webinars   |   |         |
|   |   |         |

|---|--|-------------------------------------|----------|---|---------|-------|
| Core/Elective/Supportive  |  | Core                                | 4        |   |         | 4     |
| Pre-requisite   |  | Basics of Software Engineering &SPM | Syllabus |   | 2021-22 |       |
| <b>Course Objectives:</b>   |  |                                     |          |   |         |       |
| The main objectives of this course are to:  |  |                                     |          |   |         |       |
| 1. Introduce to Software Engineering, Design, Testing and Maintenance.  |  |                                     |          |   |         |       |
| 2. Enable the students to learn the concepts of Software Engineering.   |  |                                     |          |   |         |       |
| 3. Learn about Software Project Management, Software Design &Testing.   |  |                                     |          |   |         |       |
| <b>Expected Course Outcomes:</b>  |  |                                     |          |   |         |       |
| On the successful completion of the course, student will be able to:  |  |                                     |          |   |         |       |
| 1   | Understand about Software Engineering process  |                                     |          |   |         | K1,K2 |
| 2   | Understand about Software project managements kills, design and quality management     |                                     |          |   |         | K2,K3 |
| 3   | Analyze on Software Requirements and Specification                                     |                                     |          |   |         | K3,K4 |
| 4   | Analyze on Software Testing, Maintenance and Software Re-Engineering                   |                                     |          |   |         | K4,K5 |
| 5   | Design and conduct various types and levels of software quality for a software project |                                     |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |  |                                     |          |   |         |       |
| Unit:1  |  | INTRODUCTION                        |          |   | 15hours |       |
| Introduction: The Problem Domain – Software Engineering Challenges - Software Engineering Approach – Software Processes: Software Process – Characteristics of a Software Process – Software Development Process Models – Other software processes.   |  |                                     |          |   |         |       |
| Unit:2  |  | SOFTWARE REQUIREMENTS               |          |   | 15hours |       |
| Software Requirements Analysis and Specification : Requirement engineering – Type of Requirements – Feasibility Studies – Requirements Elicitation – Requirement Analysis – Requirement Documentation – Requirement Validation – Requirement Management – SRS - Formal System Specification – Axiomatic Specification – Algebraic Specification - Case study: Student Result management system. Software Quality Management –Software Quality, Software Quality Management System, ISO 9000, SEI CMM. |  |                                     |          |   |         |       |
| Unit:3  |  | PROJECT MANAGEMENT                  |          |   | 15hours |       |
| Software Project Management: Responsibilities of a software project manager – Project planning – Metrics for Project size estimation – Project Estimation Techniques – Empirical Estimation Techniques – COCOMO – Halstead’s software science – Staffing level estimation – Scheduling– Organization and Team Structures – Staffing – Risk management – Software Configuration Management – Miscellaneous Plan.   |  |                                     |          |   |         |       |
| Unit:4  |  | SOFTWARE DESIGN                     |          |   | 15hours |       |

|   |   |         |
|---|---|---------|
| Software Design: Outcome of a Design process – Characteristics of a good software design – Cohesion and coupling - Strategy of Design – Function Oriented Design – Object Oriented Design - Detailed Design - IEEE Recommended Practice for Software Design Descriptions.   |   |         |
|   |   |         |
| Unit:5  | SOFTWARE TESTING  | 13hours |
| Software Testing: A Strategic approach to software testing – Terminologies – Functional testing– Structural testing – Levels of testing – Validation testing - Regression testing – Art of Debugging–Testingtools-Metrics-ReliabilityEstimation.SoftwareMaintenance -Maintenance Process - Reverse Engineering – Software Re-engineering - Configuration Management Activities. |   |         |
| Unit:6  | Contemporary Issues   | 2 hours |
| Expert lectures , online seminars–webinars  |   |         |
|   |   |         |
|   | Total Lecture hours   | 75hours |
|   |   |         |

| Course code   |   | PRACTICAL I: ALGORITHM AND OOPS LAB | L        | T | P       | C |
| Core/Elective/Supportive  |   | Core                                |          |   | 4       | 4 |
| Pre-requisite   |   | Basic Programming of C++ language   | Syllabus |   | 2021-22 |   |
| Course Objectives:  |   |                                     |          |   |         |   |
| The main objectives of this course are to:  |   |                                     |          |   |         |   |
| 1.This course covers the basic data structures like Stack, Queue, Tree, List.                                 |   |                                     |          |   |         |   |
| 2. This course enables the students to learn the applications of the data structures using various techniques |   |                                     |          |   |         |   |
| 3. It also enable the students to understand C++ language with respect to OOAD concepts                       |   |                                     |          |   |         |   |
| 4. Application of OOPS concepts.  |   |                                     |          |   |         |   |
| Expected Course Outcomes:   |   |                                     |          |   |         |   |
| On the successful completion of the course, student will be able to:  |   |                                     |          |   |         |   |
| 1   | Understand the concepts of object oriented with respect to C++                        |                                     |          |   | K1,K2   |   |
| 2   | Able to understand and implement OOPS concepts  |                                     |          |   | K3,K4   |   |
| 3   | Implementation of data structures like Stack, Queue, Tree, List using C++             |                                     |          |   | K4,K5   |   |
| 4   | Application of the data structures for Sorting, Searching using different techniques. |                                     |          |   | K5,K6   |   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create                                     |   |                                     |          |   |         |   |
| LIST OF PROGRAMS  |   |                                     |          |   |         |   |
| 75hours   |   |                                     |          |   |         |   |
| 1) Write a program to solve the tower of Hanoi using recursion.   |   |                                     |          |   |         |   |
| 2) Write a program to traverse through binary search tree using traversals.                                   |   |                                     |          |   |         |   |
| 3) Write a program to perform various operations on stack using linked list.                                  |   |                                     |          |   |         |   |
| 4) Write a program to perform various operation in circular queue.  |   |                                     |          |   |         |   |
| 5) Write a program to sort an array of an elements using quick sort.  |   |                                     |          |   |         |   |
| 6) Write a program to solve number of elements in ascending order using heap sort.                            |   |                                     |          |   |         |   |
| 7) Write a program to solve the knapsack problem using greedy method  |   |                                     |          |   |         |   |
| 8) Write a program to search for an element in a tree using divide& conquer strategy.                         |   |                                     |          |   |         |   |
| 9) Write a program to place the 8 queens on an8X8matrix so that no two queens Attack.                         |   |                                     |          |   |         |   |
| 10) Write a C++ program to perform Virtual Function   |   |                                     |          |   |         |   |
| 11) Write a C++ program to perform Parameterized constructor  |   |                                     |          |   |         |   |
| 12) Write a C++ program to perform Friend Function  |   |                                     |          |   |         |   |
| 13) Writea C++ program to perform Function Overloading  |   |                                     |          |   |         |   |
| 14) Write a C++ program to perform single Inheritance   |   |                                     |          |   |         |   |
| 15) Write a C++ program to perform Employee Details using files.  |   |                                     |          |   |         |   |
| Expert lectures, online seminars–webinars   |   |                                     |          |   |         |   |

| Total Lecture hours   |   | 75hours |

| Pre-requisite  |   | Basics of any OOProgramming Language | Syllabus |   | 2021-22 |       |
| Course Objectives:   |   |                                      |          |   |         |       |
| The main objectives of this course are to:   |   |                                      |          |   |         |       |
| 1. This course presents an overview of elementary data items, lists, dictionaries, sets and tuples |   |                                      |          |   |         |       |
| 2. To understand and write simple Python programs  |   |                                      |          |   |         |       |
| 3. To Understand the OOPS concepts of Python   |   |                                      |          |   |         |       |
| 4. To develop web applications using Python  |   |                                      |          |   |         |       |
| Expected Course Outcomes:  |   |                                      |          |   |         |       |
| On the successful completion of the course, student will be able to:                               |   |                                      |          |   |         |       |
| 1  | Able to write programs in Python using OOPS concepts                        |                                      |          |   |         | K1,K2 |
| 2  | To understand the concepts of File operations and Modules in Python         |                                      |          |   |         | K2,K3 |
| 3  | Implementation of lists, dictionaries, sets and tuples as programs          |                                      |          |   |         | K3,K4 |
| 4  | To develop web applications using Python                                    |                                      |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create                          |   |                                      |          |   |         |       |
| LIST OF PROGRAMS   |   |                                      | 75hours  |   |         |       |
| Implement the following in Python:   |   |                                      |          |   |         |       |
| 1. Programs using elementary data items, lists, dictionaries and tuples                            |   |                                      |          |   |         |       |
| 2. Programs using conditional branches,  |   |                                      |          |   |         |       |
| 3. Programs using loops.   |   |                                      |          |   |         |       |
| 4. Programs using functions  |   |                                      |          |   |         |       |
| 5. Programs using exception handling   |   |                                      |          |   |         |       |
| 6. Programs using inheritance  |   |                                      |          |   |         |       |
| 7. Programs using polymorphism   |   |                                      |          |   |         |       |
| 8. Programs to implement file operations.  |   |                                      |          |   |         |       |
| 9. Programs using modules.   |   |                                      |          |   |         |       |
| 10. Programs for creating dynamic and interactive web pages using forms.                           |   |                                      |          |   |         |       |
| Total Lecture hours  |   |                                      |          |   | 75hours |       |
| Text Books   |   |                                      |          |   |         |       |

# **Second Semester**

|   |   |                              |          |   |         |       |
|---|---|------------------------------|----------|---|---------|-------|
| Course code   |   | DATA MINING AND WAREHOUSING  | L        | T | P       | C     |
| Core/Elective/Supportive  |   | Core                         | 4        |   |         | 4     |
| Pre-requisite   |   | Basics of RDBMS & Algorithms | Syllabus |   | 2021-22 |       |
| Course Objectives:  |   |                              |          |   |         |       |
| The main objectives of this course are to:  |   |                              |          |   |         |       |
| 1. Enable the students to learn the concepts of Mining tasks, classification, clustering and Data Warehousing.  |   |                              |          |   |         |       |
| 2. Develop skills of using recent data mining software for solving practical problems.  |   |                              |          |   |         |       |
| 3. Develop and apply critical thinking, problem-solving ,and decision-making skills.  |   |                              |          |   |         |       |
| Expected Course Outcomes:   |   |                              |          |   |         |       |
| On the successful completion of the course, student will be able to:  |   |                              |          |   |         |       |
| 1   | Understand the basic data mining techniques and algorithms  |                              |          |   |         | K1,K2 |
| 2   | Understand the Association rules, Clustering techniques and Data warehousing contents   |                              |          |   |         | K2,K3 |
| 3   | Compare and evaluate different data mining techniques like classification, prediction, Clustering and association rule mining |                              |          |   |         | K4,K5 |
| 4   | Design data warehouse with dimensional modeling and apply OLAP operations   |                              |          |   |         | K5,K6 |
| 5   | Identify appropriate data mining algorithms to solve real world problems  |                              |          |   |         | K6    |
| K1-Remember;K2-Understand;K3 -Apply; K4-Analyze;K5 -Evaluate;K6-Create  |   |                              |          |   |         |       |
|   |   |                              |          |   |         |       |
| Unit:1  | BASICS AND TECHNIQUES   |                              |          |   | 12hours |       |
| Basic data mining tasks – data mining versus knowledge discovery in databases – data mining issues – data mining metrics – social implications of data mining – data mining from a database perspective.                    |   |                              |          |   |         |       |
| Data mining techniques: Introduction – a statistical perspective on data mining – similarity measures – decision trees – neural networks – genetic algorithms.  |   |                              |          |   |         |       |
|   |   |                              |          |   |         |       |
| Unit:2  | ALGORITHMS  |                              |          |   | 12hours |       |
| Classification: Introduction –Statistical –based algorithms -distance–based algorithms-decision tree-based algorithms-neural network–based algorithms–rule-based algorithms–combining techniques.                           |   |                              |          |   |         |       |
|   |   |                              |          |   |         |       |
| Unit:3  | CLUSTERING AND ASSOCIATION  |                              |          |   | 12hours |       |
| Clustering: Introduction–Similarity and Distance Measures–Outliers–Hierarchical Algorithms - Partitional Algorithms.  |   |                              |          |   |         |       |
| Association rules: Introduction - large item sets - basic algorithms – parallel &distributed algorithms – comparing approaches- incremental rules – advanced association rules techniques – measuring the quality of rules. |   |                              |          |   |         |       |
|   |   |                              |          |   |         |       |
| Unit:4  | DATA WAREHOUSING AND MODELING   |                              |          |   | 11hours |       |
| Data warehousing: Introduction-characteristics of a data warehouse–data marts–other aspects   |   |                              |          |   |         |       |

|  |   |          |
|--|---|----------|
| Of data mart. Online analytical processing : Introduction-OLTP & OLAP systems  |   |          |
| Data modeling –Star schema for multidimensional view –data modeling – multi fact star schema or snow flake schema – OLAP TOOLS – State of the market – OLAP TOOLS and the internet.  |   |          |
| Unit:5   | APPLICATIONS OF DATAWAREHOUSE   | 11 hours |
| Developing a data WAREHOUSE: why and how to build a data warehouse –data warehouse architectural strategies and organization issues - design consideration – data content – metadata distribution of data – tools for data warehousing – performance considerations – crucial decisions in designing a data warehouse. |   |          |
| Applications of data warehousing and data mining in government: Introduction - national data warehouses – other areas for data warehousing and data mining.  |   |          |
| Unit:6   | Contemporary Issues   | 2 hours  |
| Expert lectures, online seminars–webinars  |   |          |
|  | Total Lecture hours   | 60hours  |
| Text Books   |   |          |

| Pre-requisite  |   | Basics of OS & its functioning | Syllabus |   | 2021-22 |                |
| <b>Course Objectives:</b>  |   |                                |          |   |         |                |
| The main objectives of this course are to:   |   |                                |          |   |         |                |
| 1. Enable the students to learn the different types of operating systems and their functioning.<br>2. Gain knowledge on Distributed Operating Systems<br>3. Gain insight into the components and management aspects of real time and mobile operating systems.<br>4. Learn case studies in Linux Operating Systems   |   |                                |          |   |         |                |
| <b>Expected Course Outcomes:</b>   |   |                                |          |   |         |                |
| On the successful completion of the course, student will be able to:   |   |                                |          |   |         |                |
| 1  | Understand the design issues associated with operating systems  |                                |          |   |         | K1,K2          |
| 2  | Master various process management concepts including scheduling, deadlocks and distributed file systems |                                |          |   |         | K3,K4          |
| 3  | Prepare Real Time Task Scheduling   |                                |          |   |         | K4,K5          |
| 4  | Analyze Operating Systems for Handheld Systems  |                                |          |   |         | K5             |
| 5  | Analyze Operating Systems like LINUX and iOS  |                                |          |   |         | K5,K6          |
| <b>K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create</b>   |   |                                |          |   |         |                |
| <b>Unit:1</b>  | <b>BASICS OF OPERATING SYSTEMS</b>  |                                |          |   |         | <b>12hours</b> |
| Basics of Operating Systems: What is an Operating System? – Main frame Systems –Desktop Systems – Multiprocessor Systems – Distributed Systems – Clustered Systems –Real-Time Systems – Handheld Systems – Feature Migration – Computing Environments -Process Scheduling – Cooperating Processes – Inter Process Communication- Deadlocks –Prevention – Avoidance – Detection – Recovery. |   |                                |          |   |         |                |
| <b>Unit:2</b>  | <b>DISTRIBUTED OPERATING SYSTEMS</b>  |                                |          |   |         | <b>12hours</b> |
| Distributed Operating Systems: Issues – Communication Primitives – Lamport's Logical Clocks – Deadlock handling strategies – Issues in deadlock detection and resolution-distributed file systems –design issues – Case studies – The Sun Network File System-Coda.  |   |                                |          |   |         |                |
| <b>Unit:3</b>  | <b>REALTIME OPERATING SYSTEM</b>  |                                |          |   |         | <b>10hours</b> |
| Real time Operating Systems : Introduction – Applications of Real Time Systems – Basic Model of Real Time System – Characteristics – Safety and Reliability - Real Time Task Scheduling  |   |                                |          |   |         |                |
| <b>Unit:4</b>  | <b>HAND HELD SYSTEM</b>   |                                |          |   |         | <b>12hours</b> |
| Operating Systems for Handheld Systems: Requirements–Technology Overview–Handheld Operating Systems–Palm OS- Symbian Operating System-Android–Architecture of android–   |   |                                |          |   |         |                |

|   |   |         |
|---|---|---------|
| Securing handheld systems   |   |         |
|   |   |         |
| Unit:5  | CASE STUDIES  | 12hours |
| Case Studies : Linux System: Introduction – Memory Management – Process Scheduling – Scheduling Policy - Managing I/O devices – Accessing Files- iOS : Architecture and SDK Framework - Media Layer - Services Layer - Core OS Layer - File System. |   |         |
|   |   |         |
| Unit:6  | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars– webinars  |   |         |
|   |   |         |
|   | Total Lecture hours   | 60hours |

| Pre-requisite  |   | Basics of AI & An Introduction about ML    | Syllabus |   | 2021-22 |         |
| <b>Course Objectives:</b>  |   |  |          |   |         |         |
| The main objectives of this course are to:   |   |  |          |   |         |         |
| 1. Enable the students to learn the basic functions of AI, Heuristic Search Techniques.  |   |  |          |   |         |         |
| 2. Provide knowledge on concepts of Representations and Mappings and Predicate Logic.  |   |  |          |   |         |         |
| 3. Introduce Machine Learning with respect Data Mining, Big Data and Cloud.  |   |  |          |   |         |         |
| 4. Study about Applications & Impact of ML.  |   |  |          |   |         |         |
| <b>Expected Course Outcomes:</b>   |   |  |          |   |         |         |
| On the successful completion of the course, student will be able to:   |   |  |          |   |         |         |
| 1  | Demonstrate AI problems and techniques  |  |          |   |         | K1,K2   |
| 2  | Understand machine learning concepts  |  |          |   |         | K2,K3   |
| 3  | Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning |  |          |   |         | K3,K4   |
| 4  | Analyze the impact of machine learning on applications  |  |          |   |         | K4,K5   |
| 5  | Analyze and design a real world problem for implementation and understand the dynamic behavior of a system                            |  |          |   |         | K5,K6   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create  |   |  |          |   |         |         |
| Unit:1   | INTRODUCTION  |  |          |   |         | 12hours |
| Introduction: AI Problems - AI techniques - Criteria for success. Problems, Problem Spaces, Search: State space search - Production Systems - Problem Characteristics - Issues in design of Search.  |   |  |          |   |         |         |
| Unit:2   | SEARCH TECHNIQUES   |  |          |   |         | 12hours |
| Heuristic Search techniques: Generate and Test - Hill Climbing- Best-First, Problem Reduction, Constraint Satisfaction, Means-end analysis. Knowledge representation issues: Representations and mappings -Approaches to Knowledge representations -Issues in Knowledge representations - Frame Problem.                               |   |  |          |   |         |         |
| Unit:3   | PREDICATE LOGIC   |  |          |   |         | 12hours |
| Using Predicate logic: Representing simple facts in logic - Representing Instance and Isa relationships - Computable functions and predicates - Resolution - Natural deduction. Representing knowledge using rules: Procedural Vs Declarative knowledge- Logic programming -Forward Vs Backward reasoning -Matching-Control knowledge. |   |  |          |   |         |         |
| Unit:4   | MACHINE LEARNING  |  |          |   |         | 12hours |

|   |   |         |
|---|---|---------|
| Understanding Machine Learning: What Is Machine Learning?- Defining Big Data- Big Data in Context with Machine Learning- The Importance of the Hybrid Cloud- Leveraging the Power of Machine Learning-The Roles of Statistics and Data Mining with Machine Learning-Putting Machine Learning in Context-Approaches to Machine Learning. |   |         |
|   |   |         |
| Unit:5  | APPLICATIONS OF MACHINE LEARNING  | 10hours |
| Looking Inside Machine Learning: The Impact of Machine Learning on Applications-Data Preparation-The Machine Learning Cycle.  |   |         |
|   |   |         |
| Unit:6  | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars–webinars   |   |         |
|   |   |         |
|   | Total Lecture hours   | 60hours |
|   |   |         |
| Text Books  |   |         |

| Core/Elective/Supportive  |  | Core                                 |                     |   | 4       | 4 |
| Pre-requisite   | Basics of DM Algorithms & R<br>Programming   |                                      | Syllabus<br>Version |   | 2021-22 |   |
| Course Objectives:  |  |                                      |                     |   |         |   |
| The main objectives of this course are to:  |  |                                      |                     |   |         |   |
| 1. To enable the students to learn the concepts of Data Mining algorithms namely classification, clustering, regression.... |  |                                      |                     |   |         |   |
| 2. To understand & write programs using the DM algorithms   |  |                                      |                     |   |         |   |
| 3. To apply statistical interpretations for the solutions   |  |                                      |                     |   |         |   |
| 4. Able to use visualizations techniques for interpretations  |  |                                      |                     |   |         |   |
| Expected Course Outcomes:   |  |                                      |                     |   |         |   |
| On the successful completion of the course, student will be able to:  |  |                                      |                     |   |         |   |
| 1   | Able to write programs using R for Association rules, Clustering techniques                            |                                      |                     |   | K1,K2   |   |
| 2   | To implement data mining techniques like classification, prediction                                    |                                      |                     |   | K2,K3   |   |
| 3   | Able to use different visualizations techniques using R  |                                      |                     |   | K4,K5   |   |
| 4   | To apply different data mining algorithms to solve real world applications                             |                                      |                     |   | K5,K6   |   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |  |                                      |                     |   |         |   |
| LIST OF PROGRAMS  |  |                                      |                     |   |         |   |
| 75hours   |  |                                      |                     |   |         |   |
| 1. Implement Apriori algorithm to extract association rule of data mining.  |  |                                      |                     |   |         |   |
| 2. Implement k-means clustering technique.  |  |                                      |                     |   |         |   |
| 3. Implement any one Hierarchal Clustering.   |  |                                      |                     |   |         |   |
| 4. Implement Classification algorithm.  |  |                                      |                     |   |         |   |
| 5. Implement Decision Tree.   |  |                                      |                     |   |         |   |
| 6. Linear Regression.   |  |                                      |                     |   |         |   |
| 7. Data Visualization.  |  |                                      |                     |   |         |   |
| Total Lecture hours   |  |                                      |                     |   | 75hours |   |
| Text Books  |  |                                      |                     |   |         |   |

| Course code   |  | PRACTICAL IV: ADVANCED<br>JAVA LAB | L        | T | P       | C |
| Core/Elective/Supportive  |  | Core                               |          |   | 4       | 4 |
| Pre-requisite   |  | Basics in Java Programming         | Syllabus |   | 2021-22 |   |
| Course Objectives:  |  |                                    |          |   |         |   |
| The main objectives of this course are to:  |  |                                    |          |   |         |   |
| 1.To enable the students to implement the simple programs using JSP,JAR   |  |                                    |          |   |         |   |
| 2.To provide knowledge on using Servlets, Applets   |  |                                    |          |   |         |   |
| 3.To introduce JDBC and navigation of records   |  |                                    |          |   |         |   |
| 4.To understand RMI & its implementation  |  |                                    |          |   |         |   |
| 5.To introduce to Socket programming  |  |                                    |          |   |         |   |
| Expected Course Outcomes:   |  |                                    |          |   |         |   |
| On the successful completion of the course, student will be able to:  |  |                                    |          |   |         |   |
| 1   | Understand to the implement concepts of Java using HTML forms, JSP&JAR |                                    |          |   | K1,K2   |   |
| 2   | Must be capable of implementing JDBC and RMI concepts                  |                                    |          |   | K3,K4   |   |
| 3   | Able to write Applets with Event handling mechanism                    |                                    |          |   | K4,K5   |   |
| 4   | To Create interactive web based applications using servlets and jsp    |                                    |          |   | K5,K6   |   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |  |                                    |          |   |         |   |
| LISTOF PROGRAMS   |  |                                    |          |   |         |   |
| 75hours   |  |                                    |          |   |         |   |
| 1. Display a welcome message using Servlet.   |  |                                    |          |   |         |   |
| 2. Design a Purchase Order form using Html form and Servlet.  |  |                                    |          |   |         |   |
| 3. Develop a program for calculating the percentage of marks of a student using JSP.  |  |                                    |          |   |         |   |
| 4. Design a Purchase Order form using Html form and JSP.  |  |                                    |          |   |         |   |
| 5. Prepare a Employee payslip using JSP.  |  |                                    |          |   |         |   |
| 6. Write a program using JDBC for creating a table, Inserting, Deleting records and list out the records.                   |  |                                    |          |   |         |   |
| 7. Write a program using Java servlet to handle form data.  |  |                                    |          |   |         |   |
| 8. Write a simple Servlet program to create a table of all the headers it receives along with their associated values.      |  |                                    |          |   |         |   |
| 9. Write a program in JSP by using session object.  |  |                                    |          |   |         |   |
| 10. Write a program to build a simple Client Server application using RMI.  |  |                                    |          |   |         |   |
| 11. Create an applet for a calculator application.  |  |                                    |          |   |         |   |
| 12. Program to send a text message to another system and receive the text message from the system (use socket programming). |  |                                    |          |   |         |   |
| Expert lectures, online seminars–webinars   |  |                                    |          |   |         |   |
| Total Lecture hours   |  |                                    |          |   |         |   |
| 75hours   |  |                                    |          |   |         |   |

# **Third Semester**

| Course code  |  | DIGITAL IMAGE PROCESSING   | L        | T | P       | C     |
|--|--|----------------------------|----------|---|---------|-------|
| Core/Elective/Supportive   |  | Core                       | 4        |   |         | 4     |
| Pre-requisite  |  | Basics of Image Processing | Syllabus |   | 2021-22 |       |
| Course Objectives:   |  |                            |          |   |         |       |
| The main objectives of this course are to:   |  |                            |          |   |         |       |
| 1. Learn basic image processing techniques for solving real problems.  |  |                            |          |   |         |       |
| 2. Gain knowledge in image transformation and Image enhancement techniques.  |  |                            |          |   |         |       |
| 3. Learn Image compression and Segmentation procedures.  |  |                            |          |   |         |       |
| Expected Course Outcomes:  |  |                            |          |   |         |       |
| On the successful completion of the course, student will be able to:   |  |                            |          |   |         |       |
| 1  | Understand the fundamentals of Digital Image Processing  |                            |          |   |         | K1,K2 |
| 2  | Understand their mathematical foundations for digital image representation, image acquisition, image transformation, and image enhancement |                            |          |   |         | K2,K3 |
| 3  | Apply, Design and Implement and get solutions for digital image processing problems  |                            |          |   |         | K3,K4 |
| 4  | Apply the concepts of filtering and segmentation for digital image retrieval   |                            |          |   |         | K4,K5 |
| 5  | Explore the concepts of Multi-resolution process and recognize the objects in an efficient manner  |                            |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create  |  |                            |          |   |         |       |
| Unit:1   |  | INTRODUCTION               |          |   | 12hours |       |
| Introduction: What is Digital image processing – the origin of DIP – Examples of fields that use DIP – Fundamentals steps in DIP – Components of an image processing system. Digital Image Fundamentals: Elements of Visual perception – Light and the electromagnetic spectrum – Image sensing and acquisition – Image sampling and Quantization – Some Basic relationship between Pixels – Linear & Nonlinear operations.                            |  |                            |          |   |         |       |
| Unit:2   |  | IMAGE ENHANCEMENT          |          |   | 12hours |       |
| Image Enhancement in the spatial domain:- Background – some basic Gray level Transformations – Histogram Processing – Enhancement using Arithmetic / Logic operations – Basics of spatial filtering – Smoothing spatial filters – Sharpening spatial filters – Combining spatial enhancement methods.  |  |                            |          |   |         |       |
| Unit:3   |  | IMAGERESTORATION           |          |   | 12hours |       |
| Image Restoration: A model of the Image Degradation / Restoration Process – Noise models – Restoration is the process of noise only – Spatial Filtering – Periodic Noise reduction by frequency domain filtering – Linear, Portion – Invariant Degradations – Estimating the degradation function – Inverse filtering – Minimum mean square Error Filtering – Constrained least squares filtering – Geometric mean filter – Geometric Transformations. |  |                            |          |   |         |       |

|  |   |                |
|--|---|----------------|
| <b>Unit:4</b>  | <b>IMAGE COMPRESSION</b>  | <b>11hours</b> |
| Image Compression: Fundamentals–Image compression models–Elements of Information Theory – Error Free compression – Lossy compression – Image compression standards.  |   |                |
| <b>Unit:5</b>  | <b>IMAGE SEGMENTATION</b>   | <b>11hours</b> |
| Image Segmentation: Detection and Discontinuities – Edge Linking and Boundary deduction – Thresholding – Region-Based segmentation – Segmentation by Morphological watersheds – The use of motion in segmentation. |   |                |
| <b>Unit:6</b>  | <b>Contemporary Issues</b>  | <b>2 hours</b> |
| Expert lectures, online seminars–webinars  |   |                |
|  | <b>Total Lecture hours</b>  | <b>60hours</b> |
| <b>Text Books</b>  |   |                |

| Pre-requisite  |   | Basics of Data Science & its Applications | Syllabus |   | 2021-22 |       |
| Course Objectives:   |   |   |          |   |         |       |
| The main objectives of this course are to:   |   |   |          |   |         |       |
| 1. Introduce the students to data science, big data & its ecosystem.   |   |   |          |   |         |       |
| 2. Learn data analytics & its life cycle.  |   |   |          |   |         |       |
| 3. To explore the programming language R, with respect to the data mining algorithms.  |   |   |          |   |         |       |
| 4. Relate the relationship between artificial intelligence, machine learning and data science.   |   |   |          |   |         |       |
| Expected Course Outcomes:  |   |   |          |   |         |       |
| On the successful completion of the course, student will be able to:   |   |   |          |   |         |       |
| 1  | Understand the concept of data science and its techniques                               |   |          |   |         | K1,K2 |
| 2  | Review data analytics   |   |          |   |         | K2,K3 |
| 3  | Apply and determine appropriate Data Mining techniques using R to realtime applications |   |          |   |         | K3,K4 |
| 4  | Analyze on clustering algorithms  |   |          |   |         | K4,K5 |
| 5  | Analyze on regression methods in AI   |   |          |   |         | K6    |
| K1-Remember; K2-Understand;K3 -Apply; K4-Analyze;K5 -Evaluate;K6-Create  |   |   |          |   |         |       |
| Unit:1   |   |   |          |   |         |       |
| INTRODUCTION   |   |   |          |   |         |       |
| 12hours  |   |   |          |   |         |       |
| Introduction of Data Science: Data science and big data–facets of data-data science process- Ecosystem- The Data Science process – six steps- Machine Learning.  |   |   |          |   |         |       |
| Unit:2   |   |   |          |   |         |       |
| BASICS OF DATA ANALYTICS   |   |   |          |   |         |       |
| 12hours  |   |   |          |   |         |       |
| Data Analytics lifecycle-review of data analytics-Advanced data Analytics-technology and tools.  |   |   |          |   |         |       |
| Unit:3   |   |   |          |   |         |       |
| DATA ANALYTICS USING R   |   |   |          |   |         |       |
| 12hours  |   |   |          |   |         |       |
| Basic Data Analytics using R : R Graphical User Interfaces – Data Import and Export – Attribute and Data Types –Descriptive Statistics – Exploratory Data Analysis –Visualization Before Analysis – Dirty Data – Visualizing a Single Variable – Examining Multiple Variables – Data Exploration Versus Presentation.            |   |   |          |   |         |       |
| Unit:4   |   |   |          |   |         |       |
| CLUSTERING   |   |   |          |   |         |       |
| 12hours  |   |   |          |   |         |       |
| Overview of Clustering : K-means – Use Cases – Overview of the Method – Perform a K-means Analysis using R –Classification – Decision Trees – Overview of a Decision Tree – Decision Tree Algorithms – Evaluating a Decision Tree – Decision Tree in R – Bayes’ Theorem – Naïve Bayes Classifier – Smoothing – Naïve Bayes in R. |   |   |          |   |         |       |

|   |   |         |
|---|---|---------|
| Unit:5  | ARTIFICIAL INTELLIGENCE   | 10hours |
| Artificial intelligence: Machine Learning and deep learning in data science-Clustering, association rules. Linear regression-logistic regression-Additional regression methods. |   |         |

| Course code  |   | PRACTICAL V: DIGITAL IMAGE PROCESSING Using MATLAB         | L                | T | P        | C |
| Core/Elective/Supportive   |   | Core   |                  |   | 4        | 4 |
| Pre-requisite  |   | Basic Programming of Image Processing & an intro to MATLAB | Syllabus Version |   | 2021-22  |   |
| Course Objectives:   |   |  |                  |   |          |   |
| The main objectives of this course are to:   |   |  |                  |   |          |   |
| 1. To understand the basics of Digital Image Processing fundamentals, image enhancement and image restoration techniques |   |  |                  |   |          |   |
| 2. To enable the students to learn the fundamentals of image compression and segmentation                                |   |  |                  |   |          |   |
| 3. To understand Image Restoration & Filtering Techniques  |   |  |                  |   |          |   |
| 4. Implementation of the above using MATLAB  |   |  |                  |   |          |   |
| Expected Course Outcomes:  |   |  |                  |   |          |   |
| On the successful completion of the course, student will be able to:   |   |  |                  |   |          |   |
| 1  | To write programs in MATLAB for image processing using the techniques             |  |                  |   | K1, K2   |   |
| 2  | To be able to implement Image Enhancements & Restoration techniques               |  |                  |   | K2, K3   |   |
| 3  | Capable of using Compression techniques in an Image                               |  |                  |   | K3, K4   |   |
| 4  | Must be able to manipulate the image and Segment it                               |  |                  |   | K5, K6   |   |
| K1-Remember; K2 -Understand; K3-Apply; K4 -Analyze; K5-Evaluate; K6 -Create  |   |  |                  |   |          |   |
| LIST OF PROGRAMS   |   |  |                  |   |          |   |
| 60 hours   |   |  |                  |   |          |   |
| 1. Implement Image enhancement Technique.  |   |  |                  |   |          |   |
| 2. Histogram Equalization  |   |  |                  |   |          |   |
| 3. Image Restoration.  |   |  |                  |   |          |   |
| 4. Implement Image Filtering.  |   |  |                  |   |          |   |
| 5. Edge detection using Operators (Roberts, Prewitts and Sobels operators)   |   |  |                  |   |          |   |
| 6. Implement image compression.  |   |  |                  |   |          |   |
| 7. Image Subtraction   |   |  |                  |   |          |   |
| 8. Boundary Extraction using morphology.   |   |  |                  |   |          |   |
| 9. Image Segmentation  |   |  |                  |   |          |   |
| Total Lecture hours  |   |  |                  |   | 60 hours |   |

| Course code   |   | PRACTICAL VI:CLOUD<br>COMPUTING LAB | L        | T | P       | C |
| Core/Elective/Supportive  |   | Core                                |          |   | 4       | 4 |
| Pre-requisite   |   | Basic Programming using Cloud       | Syllabus |   | 2021-22 |   |
| Course Objectives:  |   |                                     |          |   |         |   |
| The main objectives of this course are to:  |   |                                     |          |   |         |   |
| 1.This course covers the basic data structures like Stack, Queue, Tree, List.   |   |                                     |          |   |         |   |
| 2. This course enables the students to learn the applications of the data structures using various techniques                           |   |                                     |          |   |         |   |
| 3. It also enable the students to understand C++ language with respect to OOAD concepts   |   |                                     |          |   |         |   |
| 4. Application of OOPS concepts   |   |                                     |          |   |         |   |
| Expected Course Outcomes:   |   |                                     |          |   |         |   |
| On the successful completion of the course, student will be able to:  |   |                                     |          |   |         |   |
| 1   | Understand the concepts of object oriented with respect to C++                        |                                     |          |   | K1,K2   |   |
| 2   | Able to understand and implement OOPS concepts  |                                     |          |   | K3,K4   |   |
| 3   | Implementation of data structures like Stack, Queue, Tree, List using C++             |                                     |          |   | K4,K5   |   |
| 4   | Application of the data structures for Sorting, Searching using different techniques. |                                     |          |   | K5,K6   |   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |   |                                     |          |   |         |   |
| LISTOF PROGRAMS   |   |                                     |          |   |         |   |
| 60hours   |   |                                     |          |   |         |   |
| 1. Working with Google Drive to make spreadsheet and notes.   |   |                                     |          |   |         |   |
| 2. Launch a Linux Virtual Machine.  |   |                                     |          |   |         |   |
| 3. To host a static website   |   |                                     |          |   |         |   |
| 4. Exploring Google cloud for the following a)Storage b)Sharing of data c)manage your calendar, to-do lists, d) a document editing tool |   |                                     |          |   |         |   |
| 5. Working and installation of Google App Engine  |   |                                     |          |   |         |   |
| 6. Working and installation of Microsoft Azure  |   |                                     |          |   |         |   |
| 7. To Connect Amazon Redshift with S3 bucket  |   |                                     |          |   |         |   |
| 8. To Create and Query a NoSQL Table  |   |                                     |          |   |         |   |
| Expert lectures, online seminars– webinars  |   |                                     |          |   |         |   |
| Total Lecture hours   |   |                                     |          |   |         |   |
| 60hours   |   |                                     |          |   |         |   |
| Text Books  |   |                                     |          |   |         |   |

| Pre-requisite  |  | Basic Programming using HTML tags                             | Syllabus |   | 2021-22 |   |
| Course Objectives:   |  |   |          |   |         |   |
| The main objectives of this course are to:   |  |   |          |   |         |   |
| 1. Able to design a web page using HTML tags   |  |   |          |   |         |   |
| 2. To enable the students to use Framesets, hyperlinks and different formatting features of HTML tags  |  |   |          |   |         |   |
| 3. Enable the students to use Forms & other controls in a webpage  |  |   |          |   |         |   |
| 4. To create interactive applications using PHP  |  |   |          |   |         |   |
| Expected Course Outcomes:  |  |   |          |   |         |   |
| On the successful completion of the course, student will be able to:   |  |   |          |   |         |   |
| 1  | Understand & implement the basic HTML tags to create static web pages          |   |          |   | K1,K2   |   |
| 2  | Capable of using hyperlinks, frames, images, tables,..... in a web page        |   |          |   | K2,K3   |   |
| 3  | Able to write dynamic web applications using HTML forms                        |   |          |   | K4,K5   |   |
| 4  | Must be able to write dynamic web applications in PHP & HTML tags using XAMPP. |   |          |   | K5,K6   |   |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create  |  |   |          |   |         |   |
| LIST OF PROGRAMS   |  |   |          |   |         |   |
|  |  |   |          |   | 30hours |   |
| 1. Develop a website for our college using advanced tags of HTML.  |  |   |          |   |         |   |
| 2. Write names of several countries in a paragraph and store it as an HTML document, world.html. Each country name must be a hot text. When you click India (for example), it must open india.html and it should provide a brief introduction about India. |  |   |          |   |         |   |
| 3. Develop a HTML document to i)display Text with Bullets / Numbers - Using Lists ii) to display the Table Format Data   |  |   |          |   |         |   |
| 4. Develop a Complete Web Page using Frames and Framesets which gives the Information about a Hospital using HTML.   |  |   |          |   |         |   |
| 5. Write a HTML document to print your Bio-Data in a neat format using several components.   |  |   |          |   |         |   |
| 6. Develop a HTML document to display a Registration Form for an inter-collegiate function.  |  |   |          |   |         |   |
| 7. Using HTML form accept Customer details like Name, City, Pin code, Phone number and Email address and validate the data and display appropriate messages for violations using PHP (Eg. Name is Mandatory field; Pincode must be 6digits, etc.).         |  |   |          |   |         |   |
| 8. Write a program to accept two numbers n1 and n2 using HTML form and display the Prime   |  |   |          |   |         |   |

|  |   |
|--|---|
| Numbers between n1 and n2 using PHP.                               |   |

# **Elective Courses**

| Course code   | MULTIMEDIA AND ITS APPLICATIONS   |  | L        | T | P       | C              |
|---|---|--|----------|---|---------|----------------|
| Core/Elective/Supportive  | Elective  |  | 4        |   |         | 4              |
| Pre-requisite   | Basics of Multimedia  |  | Syllabus |   | 2021-22 |                |
| <b>Course Objectives:</b>   |   |  |          |   |         |                |
| The main objectives of this course are to:  |   |  |          |   |         |                |
| 1. To introduce the students the concepts of Multimedia, Images & Animation.<br>2. To introduce Multimedia authoring tools<br>3. To understand the role of Multimedia in Internet<br>4. To know about High Definition Television and Desktop Computing–Knowledge based Multimedia systems |   |  |          |   |         |                |
| <b>Expected Course Outcomes:</b>  |   |  |          |   |         |                |
| On the successful completion of the course, student will be able to:  |   |  |          |   |         |                |
| 1   | Understand the basic concepts of Multimedia                                     |  |          |   |         | K1,K2          |
| 2   | Demonstrate Multimedia authoring tools  |  |          |   |         | K2,K3          |
| 3   | Analyze the concepts of Sound, Images, Video & Animation                        |  |          |   |         | K4             |
| 4   | Apply and Analyze the role of Multimedia in Internet and real time applications |  |          |   |         | K4,K5          |
| 5   | Analyze multimedia applications using HDTV                                      |  |          |   |         | K5,K6          |
| <b>K1-Remember; K2 -Understand; K3-Apply; K4 -Analyze; K5-Evaluate; K6 -Create</b>  |   |  |          |   |         |                |
| <b>Unit:1</b>   | <b>INTRODUCTION</b>   |  |          |   |         | <b>12hours</b> |
| What is Multimedia?–Introduction to making Multimedia–Macintosh and Windows Production platforms – Basic Software tools.  |   |  |          |   |         |                |
| <b>Unit:2</b>   | <b>MULTIMEDIA TOOLS</b>   |  |          |   |         | <b>12hours</b> |
| Making Instant Multimedia–Multimedia authoring tools–Multimedia building blocks–Text– Sound.  |   |  |          |   |         |                |
| <b>Unit:3</b>   | <b>ANIMATION</b>  |  |          |   |         | <b>10hours</b> |
| Images–Animation–Video.   |   |  |          |   |         |                |
| <b>Unit:4</b>   | <b>INTERNET</b>   |  |          |   |         | <b>12hours</b> |
| Multimedia and the Internet–The Internet and how it works–Tools for World Wide Web– Designing for the World Wide Web.   |   |  |          |   |         |                |
| <b>Unit:5</b>   | <b>MULTIMEDIA SYSTEMS</b>   |  |          |   |         | <b>12hours</b> |
| High Definition Television and Desktop Computing – Knowledge based Multimedia systems.  |   |  |          |   |         |                |

|  |   |                            |                |
|--|---|----------------------------|----------------|
| <b>Unit:6</b>  |   | <b>Contemporary Issues</b> | <b>2 hours</b> |
| Expert lectures, online seminars-webinars                          |   |                            |                |

| The main objectives of this course are to:   |   |  |          |   |         |       |
| 1. About Internet of Things where various communicating entities are controlled and managed for decision making in the application domain.   |   |  |          |   |         |       |
| 2. Enable students to learn the Architecture of IoT and IoT Technologies   |   |  |          |   |         |       |
| 3. Developing IoT applications and Security in IoT, Basic Electronics for IoT, Arduino IDE, Sensors and Actuators Programming NODEMCU using Arduino IDE.   |   |  |          |   |         |       |
| <b>Expected Course Outcomes:</b>   |   |  |          |   |         |       |
| On the successful completion of the course, student will be able to:   |   |  |          |   |         |       |
| 1  | Understand about IoT, its Architecture and its Applications                         |  |          |   |         | K1,K2 |
| 2  | Understand basic electronics used in IoT & its role                                 |  |          |   |         | K2,K3 |
| 3  | Develop applications with Cusing Arduino IDE  |  |          |   |         | K4    |
| 4  | Analyze about sensors and actuators   |  |          |   |         | K5,K6 |
| 5  | Design IoT in real time applications using today’s internet & wireless technologies |  |          |   |         | K6    |
| <b>K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create</b>   |   |  |          |   |         |       |
| <b>Unit:1</b>  |   |  |          |   |         |       |
| <b>INTRODUCTION</b>  |   |  |          |   |         |       |
| <b>12hours</b>   |   |  |          |   |         |       |
| Introduction to IoT: Evolution of IoT – Definition & Characteristics of IoT - Architecture of IoT– Technologies for IoT – Developing IoT Applications – Applications of IoT – Industrial IoT – Security in IoT   |   |  |          |   |         |       |
| <b>Unit:2</b>  |   |  |          |   |         |       |
| <b>BASIC ELECTRONICS FOR IoT</b>   |   |  |          |   |         |       |
| <b>12hours</b>   |   |  |          |   |         |       |
| Basic Electronics for IoT: Electric Charge, Resistance, Current and Voltage – BinaryCalculations – Logic Chips – Microcontrollers – Multipurpose Computers – Electronic Signals – A/D and D/A Conversion – Pulse Width Modulation.   |   |  |          |   |         |       |
| <b>Unit:3</b>  |   |  |          |   |         |       |
| <b>PROGRAMMING USING ARDUINO</b>   |   |  |          |   |         |       |
| <b>12hours</b>   |   |  |          |   |         |       |
| Programming Fundamentals with C using Arduino IDE: Installing and Setting up the Arduino IDE – Basic Syntax – Data Types/ Variables/ Constant – Operators – Conditional Statements and Loops – Using Arduino C Library Functions for Serial, delay and other invoking Functions – Strings and Mathematics Library Functions. |   |  |          |   |         |       |
| <b>Unit:4</b>  |   |  |          |   |         |       |
| <b>SENSORS AND ACTUATORS</b>   |   |  |          |   |         |       |
| <b>10hours</b>   |   |  |          |   |         |       |
| Sensors and Actuators: Analog and Digital Sensors–Interfacing temperature sensor, ultrasound   |   |  |          |   |         |       |

|  |   |         |
|--|---|---------|
| Sensor and infrared(IR) sensor with Arduino– Interfacing LED and Buzzer with Arduino.  |   |         |
|  |   |         |
| Unit:5   | SENSOR DATA IN INTERNET   | 12hours |
| Sending Sensor Data Over Internet: Introduction to ESP8266 NODEMCU WiFi Module – Programming NODEMCU using Arduino IDE – Using WiFi and NODEMCU to transmit data from temperature sensor to Open Source IoT cloud platform (ThingSpeak). |   |         |
|  |   |         |
| Unit:6   | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars–webinars  |   |         |
|  |   |         |
|  | Total Lecture hours   | hours   |
|  |   |         |
| Text Books   |   |         |

| Pre-requisite  |  | Basics of Logical & Reasoning Skills                   | Syllabus |   | 2021-22 |         |
| Course Objectives:   |  |  |          |   |         |         |
| The main objectives of this course are to:   |  |  |          |   |         |         |
| 1. Learn critical thinking and its related concepts  |  |  |          |   |         |         |
| 2. Learn design thinking and its related concepts  |  |  |          |   |         |         |
| 3. Develop Thinking patterns, Problem solving & Reasoning  |  |  |          |   |         |         |
| Expected Course Outcomes:  |  |  |          |   |         |         |
| On the successful completion of the course, student will be able to:   |  |  |          |   |         |         |
| 1  | Understand the concepts of Critical thinking and its related technology                          |  |          |   |         | K1,K2   |
| 2  | Focus on the explicit development of critical thinking and problem solving skills                |  |          |   |         | K2,K3   |
| 3  | Apply design thinking in problems  |  |          |   |         | K3,K4   |
| 4  | Make a decision and take actions based on analysis   |  |          |   |         | K4,K5   |
| 5  | Analyze the concepts of Thinking patterns, Problem solving & Reasoning in real time applications |  |          |   |         | K5,K6   |
| K1-Remember;K2 -Understand; K3-Apply;K4-Analyze; K5-Evaluate; K6 -Create   |  |  |          |   |         |         |
| Unit:1   | CRITICAL THINKING  |  |          |   |         | 12hours |
| Critical Thinking: Definition, Conclusions and Decisions, Beliefs and Claims, Evidence –finding, evaluation, Inferences, Facts – opinion, probable truth, probably false, Venn diagram. Applied critical thinking: Inference, Explanation, Evidence, Credibility, Two Case Studies, critical thinking and science, critical evaluation, self assessment. |  |  |          |   |         |         |
| Unit:2   | DESIGN THINKING  |  |          |   |         | 12hours |
| Design Thinking: Introduction, Need of Design Thinking, problem to question - design thinking process, Traditional Problem Solving versus Design Thinking, phases of Design Thinking, problem exploration, Stake holder assessment, design thinking for manufacturers, smart Idea to implementation.   |  |  |          |   |         |         |
| Unit:3   | CASE STUDY   |  |          |   |         | 12hours |
| Thinking to confidence, fear management, duty Vs passion, Team management, Tools for Thinking, prototype design, Relevance of Design and Design Thinking in engineering, human centered design, case study: apply design thinking in problem.  |  |  |          |   |         |         |
| Unit:4   | PROBLEM SOLVING  |  |          |   |         | 10hours |
| Problem solving: problem definition, problem solving methods, selecting and using information, data processing, solution methods, solving problems by searching, recognizing patterns, spatial   |  |  |          |   |         |         |

|  |   |         |
|--|---|---------|
| reasoning, necessity and sufficiency, choosing and using models, making choices and decisions.   |   |         |
|  |   |         |
| Unit:5   | REASONING   | 12hours |
| Reasoning: Deductive and hypothetical reasoning, computational problem solving; generating, implementing, and evaluating solutions, interpersonal problem solving. Advanced problem solving: Combining skills – using imagination, developing models, Carrying out investigations, Data analysis and inference. Graphical methods of solution, Probability, tree diagrams and decision trees |   |         |
|  |   |         |
| Unit:6   | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars–webinars  |   |         |
|  | Total Lecture hours   | 60hours |
|  |   |         |

| Core/Elective/Supportive  |  | Elective                                | 3        |   |         | 3     |
| Pre-requisite   |  | Basics of Block Chain & Crypto Currency | Syllabus |   | 2021-22 |       |
| Course Objectives:  |  |   |          |   |         |       |
| The main objectives of this course are to:  |  |   |          |   |         |       |
| 1. Understand the fundamentals of block chain and crypto currency.  |  |   |          |   |         |       |
| 2. Understand the influence and role of block chain in various other fields.  |  |   |          |   |         |       |
| 3. Learn security features and its significance.  |  |   |          |   |         |       |
| 4. Identify problems & challenges posed by Block Chain.   |  |   |          |   |         |       |
| Expected Course Outcomes:   |  |   |          |   |         |       |
| On the successful completion of the course, student will be able to:  |  |   |          |   |         |       |
| 1   | Demonstrate block chain technology and crypto currency   |   |          |   |         | K1,K2 |
| 2   | Understand them the mechanism in block chain   |   |          |   |         | K2    |
| 3   | Apply and identify security measures, and various types of services that allow people to trade and transact with bit coins |   |          |   |         | K3,K4 |
| 4   | Apply and analyze Block chain in healthcare industry   |   |          |   |         | K4,K5 |
| 5   | Analyze security, privacy, and efficiency of a given Block chain system  |   |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |  |   |          |   |         |       |
| Unit:1  |  |   |          |   |         |       |
| INTRODUCTION  |  |   | 12hours  |   |         |       |
| Introduction to Block chain - The big picture of the industry – size, growth, structure, players. Bitcoin versus Crypto currencies versus Blockc hain - Distributed Ledger Technology (DLT). Strategic analysis of the space – Block chain platforms, regulators, application providers. The major application: currency, identity, chain of custody. |  |   |          |   |         |       |
| Unit:2  |  |   |          |   |         |       |
| NETWORK AND SECURITY  |  |   | 12hours  |   |         |       |
| Advantage over conventional distributed database, Blockchain Network, Mining Mechanism, Distributed Consensus, Blockchain 1.0, 2.0 and 3.0 – transition, advancements and features. Privacy, Security issues in Blockchain.   |  |   |          |   |         |       |
| Unit:3  |  |   |          |   |         |       |
| CRYPTO CURRENCY   |  |   | 12hours  |   |         |       |
| Crypto currency - History, Distributed Ledger, Bitcoin protocols -Symmetric-key cryptography - Public-key cryptography - Digital Signatures -High and Low trust societies - Types of Trust model: Peer-to-Peer, Leviathan, and Intermediary. Application of Cryptography to Blockchain  |  |   |          |   |         |       |
| Unit:4  |  |   |          |   |         |       |
| CRYPTO CURRENCY REGULATION  |  |   | 11hours  |   |         |       |
| Crypto currency Regulation-Stake holders, Roots of Bitcoin, Legal views-exchange of crypto currency-Black Market-Global Economy. Cyrpto economics–assets, supply and  |  |   |          |   |         |       |

|   |  |         |
|---|--|---------|
| demand, inflation and deflation – Regulation.   |  |         |
|   |  |         |
| Unit:5  | CHALLENGES IN BLOCKCHAIN   | 11hours |
| Opportunities and challenges in Block Chain – Application of block chain: Industry 4.0 – machine to machine communication –Data management in industry 4.0–futureprospects.Block chain in Health 4.0 – Block chain properties - Healthcare Costs - Healthcare Quality - Healthcare Value - Challenges for using block chain for healthcare data |  |         |
|   |  |         |
| Unit:6  | Contemporary Issues  | 2 hours |
| Expert lectures, online seminars–webinars   |  |         |
|   |  |         |

| Course code   |  | ROBOTIC PROCESS AUTOMATION<br>FOR BUSINESS | L        | T | P       | C     |
|---|--|--|----------|---|---------|-------|
| Core/Elective/Supportive  |  | Elective                                   | 3        |   |         | 3     |
| Pre-requisite   |  | Basics of Robots & its Applications        | Syllabus |   | 2021-22 |       |
| Course Objectives:  |  |  |          |   |         |       |
| The main objectives of this course are to:  |  |  |          |   |         |       |
| 1. Learn the concepts of RPA, its benefits, types and models.   |  |  |          |   |         |       |
| 2. Gain the knowledge in application of RPA in Business Scenarios.  |  |  |          |   |         |       |
| 3. Identify measures and skills required for RPA  |  |  |          |   |         |       |
| Expected Course Outcomes:   |  |  |          |   |         |       |
| On the successful completion of the course, student will be able to:  |  |  |          |   |         |       |
| 1   | Demonstrate the benefits and ethics of RPA         |  |          |   |         | K1,K2 |
| 2   | Understand the Automation cycle and its techniques |  |          |   |         | K2    |
| 3   | Draw inferences and information processing of RPA  |  |          |   |         | K3,K4 |
| 4   | Implement & Apply RPA in Business Scenarios        |  |          |   |         | K5    |
| 5   | Analyze on Robots & leveraging automation          |  |          |   |         | K5,K6 |
| K1-Remember;K2 -Understand; K3-Apply;K4 -Analyze; K5-Evaluate; K6 -Create   |  |  |          |   |         |       |
| Unit:1  |  |  |          |   |         |       |
| INTRODUCTION  |  |  |          |   |         |       |
| 12hours   |  |  |          |   |         |       |
| Introduction to RPA –Overview of RPA –Benefits of RPA in a business environment -Industries & domains fit for RPA - Identification of process for automation - Types of Robots - Ethics of RPA & Best Practices - Automation and RPA Concepts - Different business models for implementing RPA-Centre of Excellence –Types and their applications –Building an RPA team -Approach for implementing RPA initiatives.                                   |  |  |          |   |         |       |
| Unit:2  |  |  |          |   |         |       |
| AUTOMATION  |  |  |          |   |         |       |
| 12hours   |  |  |          |   |         |       |
| Role of a Business Manager in Automation initiatives-Skills required by a Business Manager for successful automation - The importance of a Business Manager in automation - Analyzing different business processes - Process Mapping frameworks - Role of a Business Manager in successful implementation – Part 1 - Understanding the Automation cycle – First 3 automation stages and activities performed by different people.                     |  |  |          |   |         |       |
| Unit:3  |  |  |          |   |         |       |
| AUTOMATION IMPLEMENTATION   |  |  |          |   |         |       |
| 12hours   |  |  |          |   |         |       |
| Evaluating the Automation Implementation Detailed description of last 3 stages and activities performed by different people - Role of a Business Manager in successful completion – Part 2 - Activities to be performed post-implementation - Guidelines for tracking the implementation success - Metrics/Parameters to be considered for gauging success - Choosing the right licensing option - Sending emails - Publishing and Running Workflows. |  |  |          |   |         |       |
| Unit:4  |  |  |          |   |         |       |
| ROBOT   |  |  |          |   |         |       |
| 12hours   |  |  |          |   |         |       |

|  |   |         |
|--|---|---------|
| Ability to process information through scopes/systems - Understand the skill of information processing and its use in business - Leveraging automation - Creating a Robot - New Processes. Establish causality by variable behavior - Understand the skill of drawing inference or establishing causality by tracking the behavior of a variable as it varies across time/referenced variable - Leveraging automation for this skill - Robot & new process creation. |   |         |
|  |   |         |
| Unit:5   | ROBOT SKILL   | 10hours |
| Inference from snapshots of curated terms – Omni-source data curation - Multisource trend tracking - Understand the skill of drawing inference from the behavior of curated terms by taking snapshots across systems in reference to time/variable(s) - Leveraging automation for this skill – Robot creation and new process creation for this skill.   |   |         |
|  |   |         |
| Unit:6   | Contemporary Issues   | 2 hours |
| Expert lectures, online seminars–webinars  |   |         |
|  |   |         |
|  | Total Lecture hours   | 60hours |
|  |   |         |
| Text Books   |   |         |

## **M.Sc. COMPUTER SCIENCE**

### **Syllabus (Effect for 2025-2026 Onwards)**

**Program Code:**

**DEPARTMENT OF COMPUTER SCIENCE**

## DEPARTMENT OF COMPUTER SCIENCE

### MISSION

1. To keep pace with emerging technologies and concepts, students are thrown open to the ever changing arena, meeting the industry requirements and standards, with the necessary knowledge and skill sets.
2. A retrained to explore more, at their own pace, knowing the demands of the IT world.
3. Apart from all the technical stuff, to inculcate the students about the Human Values and Professional ethics and to play a vital role in the society. Imparting them not only as world class Professionals, but also as tech savvy human beings to serve mankind.
4. **ELECTIVE– I**
5. 1.1.Multimedia and its Applications
6. 1.2.Embedded Systems
7. 1.3.Internet of Things
8. 1.4.Critical Thinking, Design Thinking and Problem Solving
9. **ELECTIVE– II**
10. 2.1. Mobile Computing
11. 2.2.Block Chain Technology
12. 2.3.WebServices
13. 2.4.RoboticProcessAutomationforBusiness
